

NAPA NEW PREMIUM C.V. AXLE

ATV-UTV CV Axles Features & Benefits

NAPA New Premium C.V. Axles for ATVs, UTVs, and Side-by-Sides are engineered from the ground up to be the highest quality, most reliable, and toughest CV axles on the market.

OE Replacement CV Axles

- Handles up to 20% more torque than OEM axles (measured at axle breakage during testing)
- Heat treated chrome steel solid center shaft improves performance and longevity
- High quality neoprene CR rubber dust boots have greater flexibility as well as heat and chemical resistance than original equipment boots
- High performance moly grease in all axle joints provides better metal adhesion and resistance to high shock loads
- Meets all OEM axle specifications for travel and joint articulation

Heavy Duty CV Axles

- Handles up to 35% more torque than OEM axles (measured at axle breakage during testing)
- Heat treated chromoly steel solid center shaft has greater density and strength than chrome steel
- Premium quality thermoplastic elastomer (TPE) dust boots are stronger, more rigid, and offer increased resistance to puncture than neoprene CR rubber
- High performance, high temperature moly grease in all axle joints provides superior protection against extreme use
- Meets OEM travel specifications and exceeds OEM joint articulation specifications by up to 5 degrees
