

New EV C.V. Axles

DESIGNED FOR ELECTRIC VEHICLE APPLICATIONS

Now Available for the Aftermarket

NEW

NAPA® New EV C.V. Axles are designed specifically for the demand of today's electric vehicles that deliver higher torque loads during acceleration compared to traditional ICE vehicles.

Additionally, they are engineered to minimize NVH (noise, vibration, and harshness) to provide the same quiet, smooth operation as the OE design.

MAXIMIZE YOUR SALES OPPORTUNITIES

EV numbers cover over 3.6 million vehicles in operation (VIO Data)

KEY BENEFITS:

- Designed to handle the high torque delivery and packaging considerations of electric drivetrains
- Constructed of advanced materials that offer improved strength-to-weight ratios while maintaining durability, improving efficiency, and enhancing overall vehicle performance
- Calculated improvements focused on minimizing NVH levels for a smoother and quieter driving experience
- Provide the same dependable quiet, smooth ride as designed by OE

FIT

Designed for EV applications.

FORM

Provide an OE matched replacement for high torque Electric Vehicles.

FUNCTION

Operate like the OE axle providing the same driving feel and standards for NVH.
